Registered Devices

Enter the number of devices you wish to register:

OK Cancel

Name Name All Test **Register** Cancel OK

This screen will pop up. When it does choose register from the bottom.

Type the number of devices you want to register.

Registered Devices

1) Press and hold the Register button

2) Wait until both the red and green lights turn on

3) Release the Register button, then enter the following 3 letter registration code by pressing each letter in turn...

Stop Registering **FDA**

This box will pop up and walk you through registering the votes. Step three gives you a code to type in.

In this case, I registered 18 votes. When I done registering them this is what your screen should look like.

Change the name of each device by clicking within the device name field and typing an appropriate name. (You could use numbers or you could type students names if you only have one class)

The screen should look like this where the device column turns yellow.

Push any button of the ACTIVote to send the name to the device.
